# Waterproofing flanged tray installation

Create rebate in floor to accept the
flanged tray.
Ensure the outlet location and rebate
are sized to suit the flanged tray.
Lay the tray in position with outlet connecting
to the riser of the waste.
Fix the tray in position once level and height
are set.
NOTE, the grate should finish 1-2mm lower than
the adjacent tile.
Apply a suitable waterproofing membrane as
per relevant standards and building code.
The flanged tray is suitable for use as a
waterproofing flange.
Once the watperproofing membrane is cured
tiling can be completed.
For tiling, ensure the grate is removable
and not locked in by tiles.
Test fitting of the grate during tiling is
suggested.
